

Gluten Allergy Symptoms

Gluten is a type of protein that is very complicated, and for this reason is very tough to absorb. This is the reason why children are not provided wheat when they were initially presented to solid foods. They are offered a thin porridge made from rice, which their immature digestion system can handle easily.

Malabsorption

The intestinal tracts of the body take in nutrients from the digested foods. There are numerous aspects that can result in a disability of the absorption of nutrients. Some of them are cystic fibrosis, celiac disease, pernicious anemia, biliary atresia, etc. Malabsorption can be specific in addition to non-specific. It is another possible reason for swelling in the stomach.

Intense Pancreatitis
