

Natural Remedies for IBS

IBS is a widespread digestive disorder that affects nearly 50 million Americans. For an illness that has such a high incidence rate and causes a lot of pain, it receives very little attention. Hence, there must be greater awareness on the remedial measures for relieving this condition. Depending on the severity and frequency of indicants, IBS can greatly interfere with the quality of life. Regrettably, the drug intervention protocols have not proved to be very effective in providing long-term relief, and a few of them have resulted in side effects that have worsened the original symptoms. Nevertheless, the good news is that there are numerous natural treatments for IBS that are efficacious and help in healing the body in a synergistic manner.

- Treatment: For treating this condition, certain over-the-counter laxatives can be taken.
- Consuming a high fiber diet, drinking lots of fluids, and exercising regularly also provides relief from **constipation**.
- Order to make the pepper mint tea merely brew one to two tea spoons of dried mint leaves per 8 ounce cup of fresh boiling water.
- Now you can add sugar to your preference and drink it two or three times a day with no trouble.

Medical Treatment

As discussed earlier, there is no cure for spastic colon. The standard treatment is aimed at providing remedy for the signs. It consists of medicines to manage diarrhea/constipation, antidepressants, anticholinergic medications (to control activities of the autonomic nervous system and for relief from bowel spasms), antibiotics (for patients with overgrowth of bacteria in the intestine), and fiber supplements (for those with constipation). Spastic colon patients should avoid foods, like carbonated beverages, salads, and raw fruits. Vegetables, like cabbage, broccoli, and cauliflower, are also not good for them. Such foods cause bloating.

Home Remedies

As there is no cure for this condition, the only way out is to control the signs. Most of the remedies mentioned above, are found to be effective, for this purpose. These are a few of the treatments that can help you in controlling the symptoms of spastic colon. All you need to do is avoid the trigger factors, and adopt the remedial measures.

Pain in Lower Left Abdomen Abdominal pain can either be a symptom of some disorder or a transient condition in itself. There are some essential organs located near the abdomen. For that reason, a disorder that takes place in any of these organs can result in pain in the...

IbsConstipationDiarrheaIrritable Bowel Syndrome

Irritable Bowel Syndrome (IBS).

IBS is associated with the conditions of big intestine. This disorder may trigger constipation, bloating, burping, cramping, diarrhea, etc. There is no proper treatment to treat this disorder but by following couple of precautions and by getting rid of few food items from your diet, you can take control over the condition.

- Treatment: For the treatment of tapeworm infection, the doctor usually recommends parasite-killing medicines to kill the intestinal parasite.
- Examples of such medications are praziquantel (biltricide) and nitazoxanide (alinia).
- To prevent tapeworm infection, wash your hands properly before eating and after using the toilet.
- Also, maintaining health in the kitchen is recommended.
- Get your meat and fish from a reliable source and cook them thoroughly as all the eggs are killed in the process.

Cause - Irritable Bowel Syndrome.

The cramping is accompanied by symptoms such as abdominal pain, mucous in stool, constipation or diarrhea, stomach bloating and gas, it could be due to irritable bowel syndrome. The main reasons behind this condition are stress, allergic reactions to specific food products such as dairy products, hormonal imbalances, certain medication and other diseases such as **diarrhea**.
