Nervous Stomach Symptoms

Nervous stomach is not a disease; but having a sour stomach every now and then suggests dysfunction of the digestive system. Remember, inactive or stressful lifestyle can be the main reason for 'indigestion' incidents. As you understand, wrong eating habits can cause stomach problems. Nervous stomach symptoms may vary according to the cause.

- Severe Gastritis Acute gastritis is the sudden swelling of the inner lining of the stomach caused due to bacterial or viral infection.
- Abdominal pain and tightness, nausea, bloating, vomiting and loss of appetite are the symptoms of gastritis.

Infections

Infections in the urinary tract may lead to flank discomfort; these urinary tract infections are primarily caused by bacteria. The germs cause the infection to travel from the intestinal tract into the bladder through the urethra and cause a bladder infection. Though considered treatable, a urinary tract infection may cause pain until it is completely cured. The infection, generally, is accompanied by nausea, fever, and a burning sensation while urinating.

Ulcerative Colitis

Ulcerative colitis is also a disease characterized by inflammation of the large intestine. There are different types of ulcerative colitis. But the one that causes stomach ache and diarrhea together is proctosigmoiditis. Proctosigmoiditis in turn is defined by the inflammation of the sigmoid colon and the rectum.

“

Bowel Movement Problems Problems related to the bowel movement trigger a great deal of pain and impact your day-to-day life. Generally, they occur due to different factors such as unhealthy diet, parasitic infection, particular illness, etc. Ways to Get Rid of Bloating...

Symptoms

People dealing with diabetes and arthritis may also experience pain in the right flank from time to time. An injury to the lower back area or a muscle pull may also lead to flank discomfort. The flank region is vulnerable to intense pain when there is extrinsic movement. The pain raises when the range of motion increases. The side where the pain is actively skilled indicates which, and how far the kidney has been affected.

- Appendicitis The appendix is a small tubular organ present at the lower end of the cecum.
- Appendicitis is the inflammation of the appendix.
- It is a serious medical condition that needs to be dealt with immediately.
