

# Toxic Black Mold Exposure Symptoms in Humans

**B**lack mold, a slimy, greenish-black substance, is known for its high toxicity given its toxic by-products called mycotoxins. Once they make their way into the body, they could give rise to a wide variety of undesirable symptoms. The majority of mold-related illnesses are diagnosed in individuals with weak or compromised immune system. For example, babies whose immune system has not fully developed, people who are too old to have a strong immune system, and those suffering from chronic diseases such as AIDS, cancer, pneumonia, bronchitis, and other respiratory disorders, are the ones who are severely and the most affected by the direct exposure to toxic black mold.

## Digestion Problems

Another typical cause for the presence of mucus in stools is issues in the digestive system. This is one of the most common causes for why there could be mucous in an infant's stool. A child's digestive system is already very delicate and any change in diet, like a switch from the intake of fluids to solids can lead to the deterioration of the GI tract. This factor likewise gives way for pregnant women since there is already a lot of pressure that is placed on their systems. Thus, with any additional pressure, there can be an extreme production of yellow mucus. Besides that, gallbladder issues can also lead to the production of mucus in the stool.

*Signs of Liver Damage Causes of Liver Damage Liver Damage Treatment and Preventative measure*

To detect any type of liver damage, you need to go through a couple of tests which will also find out the cause behind the damage. Once the diagnosis is over, treatment will rely on the cause of liver disorder or disease. Some of the diseases which need immediate and correct medical attention and treatments are autoimmune disorder, glycogen storage illness, hepatitis A, B, C and D, Wilson's disease, hemochromatosis, cancer, etc. A few of the diseases may get cured by medication whereas some may require surgery. Liver transplant may also be performed in case of complete liver damage.

## Symptoms Caused by Black Mold

One of the most Common Ones.

“

*Irritable Bowel Syndrome and the Lack Of Allopathic Treatments Irritable Bowel Syndrome is a condition involving abnormal function and activity in the colon or the large intestinal tract. Being that it is a syndrome, which simply indicates a group of signs, there are no known exact causes why this group of...*

Ibs

- Chronic sinusitis is one of the main repercussions of long-term exposure to black mold.
- And this is manifested by runny nose, sinus headache, sinus drainage and sinus cough.
- Is also common for people living in moldy environment to complain against headaches, burning, dry or itchy eyes, as well as skin rashes.
- To make things worse, the individual might feel nauseating, have trouble in breathing especially if he/she is asthmatic, and lethargy.
- Dizziness, lack in concentration, and irritation in mucous membranes might also accompany.

## Irregularity

Irregularity is another major cause that could lead to mucus production. When there is constipation, the body might produce more quantities of mucus so that the hardened stools can be softened. Because a person has not been able to relieve himself for a few days, the production of mucus is done in large quantities and that is what will reveal through. While this condition can affect anyone, it has been seen that pregnant women are more likely to suffer from constipation.

“ Turns out that after being a doctor in Italy for multiple years he became really interested in Chinese medicine and precisely how outside elements customize our health. We're talking about heavy metal poisoning, diet plans, allergies, work posture etc. I had heard of this individual from a bunch of buddies that he had actually helped out. He had identified and successfully detoxed an expectant friend of mine that was struggling with mercury poisoning. The year prior to he had actually 'repaired' with a few acupuncture sessions a back condition of another good friend of mine that had being diagnosed (or should I say 'mis diagnosed') as a disc herniation. My friend had gone from barely walking to playing sports when again.
